the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy. In the Netherlands, the service sector has also become the dominant sector, but the increase is less pronounced than in the United States.

The increase in the service sector has led to a decrease in the number of people who are employed in the manufacturing sector. This is true for all countries. The decrease is most pronounced in the United States, where the manufacturing sector has become the second largest sector of the economy. In the Netherlands, the manufacturing sector has also become the second largest sector, but the decrease is less pronounced than in the United States.

The increase in the service sector and the decrease in the manufacturing sector have led to a change in the composition of the labor force. The labor force is now more service-oriented than in the past. This is true for all countries. The change is most pronounced in the United States, where the service sector now employs more than 70% of the labor force. In the Netherlands, the service sector now employs about 60% of the labor force.

The change in the composition of the labor force has led to a change in the demand for skills. The demand for high skills has increased, while the demand for low skills has decreased. This is true for all countries. The increase in the demand for high skills is most pronounced in the United States, where the demand for high skills has increased by more than 50% since the 1980s. In the Netherlands, the demand for high skills has also increased, but by a smaller amount.

The change in the demand for skills has led to a change in the distribution of income. The income distribution is now more unequal than in the past. This is true for all countries. The increase in income inequality is most pronounced in the United States, where the income inequality has increased by more than 50% since the 1980s. In the Netherlands, the income inequality has also increased, but by a smaller amount.

The change in the distribution of income has led to a change in the demand for social services. The demand for social services has increased, while the demand for private services has decreased. This is true for all countries. The increase in the demand for social services is most pronounced in the United States, where the demand for social services has increased by more than 50% since the 1980s. In the Netherlands, the demand for social services has also increased, but by a smaller amount.

The change in the demand for social services has led to a change in the composition of government spending. The government spending is now more social-oriented than in the past. This is true for all countries. The increase in social-oriented government spending is most pronounced in the United States, where the social-oriented government spending has increased by more than 50% since the 1980s. In the Netherlands, the social-oriented government spending has also increased, but by a smaller amount.

The change in the composition of government spending has led to a change in the distribution of income. The income distribution is now more equal than in the past. This is true for all countries. The decrease in income inequality is most pronounced in the United States, where the income inequality has decreased by more than 50% since the 1980s. In the Netherlands, the income inequality has also decreased, but by a smaller amount.
